EXPERIENCE

• Tata Consultancy Services

Feb, 2025 - Current

System Engineer - Backend Development

Pune, India

- Developed an **internal incident management platform** for AMS operations, automating **ticket lifecycle, SLA tracking, escalation, and audit trails** for **500+ monthly service requests**.
- Built **Spring Boot REST APIs (layered architecture, RBAC, transactional Spring Data JPA)** over optimized relational models, cutting ticket-retrieval and dashboard response time by **~25%**.
- Implemented **AI-assisted ticket triaging** using **vector embeddings** and **semantic similarity search** to detect duplicate incidents and surface historical resolutions.
- Reduced **manual follow-ups** by **~30%** by automating **status transitions, SLA breach alerts**, and ownership visibility.

PROJECTS

• StayWe — Living Operations OS for PG & Co-living Management

Tools and Technologies: *Java, Spring Boot, Modulith, PostgreSQL, Redis, Kafka, Resilience4j, React, TypeScript, Docker*

[\[Live\]](#)

- Built a **production-grade full-stack SaaS** for PG/co-living operations with **3 role-based workflows** (Admin/Owner/Tenant) and a **role-gated React** frontend; **profile-gated** to run locally or as a **7-service container stack**.
- Architected a **Spring Boot modular monolith** (**Spring Modulith** build-time boundary enforcement, **15+ domain modules**) with **JWT** authentication and **RBAC**.
- Built **event-driven messaging** via a **Kafka transactional-outbox** pipeline, with **Redis** caching/distributed rate-limiting and **ShedLock** single-instance scheduling across replicas.
- Hardened reliability with **Resilience4j** circuit breakers (**60% threshold, 3 retries**), **Flyway**-managed PostgreSQL (**25+ migrations**), and **Prometheus/Grafana** metrics with **Micrometer** tracing.
- Deployed on **AWS EC2** via **Docker Compose** (CI-built images from **GHCR**) behind **Nginx**; **GitHub Actions** CI/CD with **Testcontainers** tests, **JaCoCo** gate, and a **Terraform** IaC scaffold.

• sentinelAI — AI-Powered Incident Intelligence Platform

Tools and Technologies: *Java, Spring Boot, Spring Security, React, FastAPI, PostgreSQL, pgvector, Sentence Transformers, Docker*

[\[Live\]](#)

- Engineered **sentinelAI**, a full-stack **incident intelligence platform** with structured investigations, ownership transfers, lead approvals, and automated activity tracking, secured via **JWT + RBAC**.
- Built a **FastAPI** AI microservice for transcript analysis and **semantic incident retrieval** (**Sentence Transformer** embeddings + **pgvector**) to surface resolved incidents and reusable solutions; deployed via **Docker / Nginx** on **Render**, **Neon PostgreSQL**, and **Hugging Face Spaces**.

SKILLS

Languages:	Java, Python, JavaScript, C++, SQL
Backend:	Spring Boot, Spring Security, Spring Data JPA, REST APIs, FastAPI, JWT, RBAC
Databases:	PostgreSQL, MySQL, pgvector, Flyway
Distributed Systems:	Microservices, Event-Driven Architecture, Apache Kafka, Redis, Resilience4j, ShedLock
Cloud & DevOps:	AWS, Docker, GitHub Actions, Terraform, Nginx
Observability & Testing:	Prometheus, Grafana, JUnit 5, Maven
Computer Science:	Data Structures & Algorithms, Operating Systems, Database Management System, Computer Networks, Object Oriented Programming, System Design, Problem Solving
AI:	Semantic Search, Vector Embeddings, LLM Integration

ACHIEVEMENTS

- **1800+** contest rating with 750+ solved problems on **LeetCode**.
- Among **top 25** out of 1000 teams in **CodeUtsava 6.0** organized by **National Institute of Technology, Raipur**.

EDUCATION

• United Institute of Technology

Bachelor of Technology - Computer Science and Engineering (CGPA: 7.71)

Nov, 2020 - Jun, 2024

Prayagraj, India
